Coronavirus Staff Update

If you or any of the people in your household have a persistent cough and/or a high temperature then you and all of your household must isolate for a period of 14 days.

You must not come to work or visit the care home under any circumstances.

Please ensure you call us to communicate your absence at your earliest convenience.

If you or anyone in your household do not have any symptoms then you are ok to come to work.

Please ensure that on entry to the care home that you wash your hands immediately at the nearest bathroom facility before clocking on.

If you have an underlying health condition which could give an increased risk of severe illness from Coronavirus, then please speak to Lynn Garner to discuss options.

We understand that this will be a difficult time for all employees and we strive to do everything we can to maintain the safe care of the residents.

We thank you for your understanding at this time.

Caring because we care
